## DEAL COMPLETED WITH AVIATORS

Two Days of High Flying on the Cards for the Week End.

TO SHOW AT FAIRGROUNDS

Sailing in Rare Air at High Altitude

Will be Watched With Interest By Scientists.

Salt Lake will be the first city in an intermountain country to have an aviation meet, the French aviators who have been exhibiting in Los Angeles and San Francisco having signed an agreement with Secy. Joseph E. Caine of the Commercial club to give an exhibition, at the fair grounds, Jan. 25 and 26. The negotiations, after having hung fire for 10 days, were finally closed Monday night, when the manager of the aviators accepted the terms of the Commercial club.

The star of the exhibition is Louis Paulhan, who broke all endurance records at Los Angeles. He is an aviator of international reputation and at the great meet at Rheims, France, a year ago, took precedence in many events. He has a Farman biplane and a Blériot monoplane, the former so closely modeled after the designs of the Wright brothers as to cause a suit for infringement when they were brought to this country. The other two members of the exhibiting party are Miss Carol and Misson, who are not only eminent aviators, but also scientists of note.

Special excursions for one fare the round trip will be run on all of the railroads and will be effective Friday, Saturday, Sunday and Monday. All stations on the Oregon Short Line, on the Salt Lake and Ogden, and all stations in Utah on the Union Pacific, Denver & Rio Grande, and Salt Lake Route are included. On the Southern Pacific the rates will be in effect as far west as Sparks, Nev. The cooperation of the railroads thus gives a great territory to draw upon which has butte to the north, Reno to the west, Grand Junction on the east, and Barclay to the south. The meet is to be as largely advertised in this territory as the limited time will permit.

ADVANCE SALE OF TICKETS.  
Tickets may be purchased prior to the meet at a reduced rate, but those who do not provide themselves with these necessary credentials will be charged the full price at the gate. This is the plan which has worked successfully both at Los Angeles and San Francisco, bringing about a large advance sale and preventing congestion at the gates. The tickets will be placed on sale at various places as soon as they come from the hands of the printers.

Work was commenced today preparing the fair grounds for the meet. The aviators desire a straightaway course of 500 yards and shelter for the start. It is thought that the fair grounds, which are in excellent condition, will prove an ideal place for the exhibition. It will accommodate a tremendous crowd and the transportation facilities afforded are the best of any suburban points of Salt Lake.

Much interest is attached to the meet throughout the world, as it will be the first time in the history of aviation that an attempt has been made to fly at any place that had more than a slight elevation above sea level. All of the great meets have been held on the lowlands. The possibility of the rare atmosphere affecting the flights will be decided, an interesting point in scientific aviation.

Paulhan is not satisfied with the records which he made at Los Angeles, and should conditions prove good, will attempt to cut new notches in the handle of aviation gun. Manager Charles H. Jones, who has charge of the meet, will be in this city Friday. On Saturday and Sunday Salt Lake will be the center of aviation interest throughout the world.
